Summer 2007 Newsletter

The warm weather has finally arrived! It's time to enjoy all the outdoor activities and festivals of the season.

Staffing Update

Please join us in welcoming our newest *Turn Back Time Medispa* Team member, Jorie Hezinger. She is a graduate of the Skin Care and Spa Institute. She is certified in various skin care, peel, and microdermabrasion treatments.

We are thrilled to have her on staff because we can now offer our clients aesthetic services on Tuesdays with Jorie, on Wednesdays with Bonnie, and on Fridays with Denise.

Please call **847-681-8700** to schedule your aesthetic service today!

Services Update

Have you ever wondered what Microdermabrasion and Peels were about??? This is why should have regular Microdermabrasion treatments.

Microdermabrasion

Microdermabrasion is effective in reducing fine lines, "crow's feet", age spots, some types of acne scars, as well as minimizing pores. It stimulates the production of skin cells and collagen. The hand piece emits crystals onto the surface of the skin with a simultaneous vacuum suction in a closed-loop system. The treatment gently exfoliates or "polishes" the skin. Each treatment is 30-60 minutes, depending on the surface area(s) being treated. For optimal results, 4-12 treatments are recommended, scheduled 2-4 weeks apart. Maintenance of results requires periodic repeat treatments after the initial regimen is completed. Microdermabrasion may be combined with a light chemical peel to further increase the effects.

Chemical Peels

Peels help to stimulate, firm, and tighten the skin, and are also great for treating acne, some types of scars, and uneven pigmentation. Chemical peels speed up your skin's natural exfoliating process, thereby enabling new, healthier cells to come to the surface quicker. The result is a healthier, more youthful appearance and a more even tone and texture. The types of chemical peels we offer are gentle, non-toxic, light to medium range peels that can be performed anywhere on the body.

New Product

Turn Back Time Medispa now offers *Perlane*®. *Perlane*® is the newest dermal filler added to the *Restylane*® family. *Perlane*® has been approved for use in the United States to treat moderate to severe facial wrinkles, such as the lines from the area around the nose to the corners of the mouth.

The hyaluronic acid gel in *Perlane*® is composed of larger gel particles than *Restylane*® and is intended for deeper injection to volumize the skin for structural support.

Please call us today to schedule your complimentary consultation at **847-681-8700**.

Product Update

This time of year is extremely important to remember the use of good sunscreen products. Obagi Nu-Derm Healthy Skin Protection SPF35 received the award for the Skin Cancer Foundation Seal of approval. Obagi Nu-Derm Healthy Skin Protection contains micronized zinc oxide to protect skin for damaging UVA and UVB rays.

Recommended
as an effective
UV sunscreen

Referral Program

Thank you to all our clients who participate in the referral program. Remember, for every person you refer to Turn Back Time Medispa that completes a treatment or procedure, you will receive a \$25 gift certificate to be used toward your next treatment or procedure of \$250 or more. The more people you refer, the more gift certificates you will receive.
